

Key Benefits

- ✓ 'Beauty from within' nutrient
- ✓ NLT 15% tripeptides
- ✓ 1500 Da avg. Molecular Wt.
- ✓ Traceable, Kosher fish source
- ✓ BSE & FMD free
- ✓ Proven bioavailability
- ✓ Low, 1g dosing for capsule delivery
- ✓ Neutral taste and odor
- ✓ Clinically proven
- ✓ Batch-tested for molecular weight

MoriKol® is a bioavailable, marine-sourced, 'beauty-from-within' health nutrient supplying very low molecular weight collagen peptides (LMWCP) at a 15% tripeptide standard. **MoriKol®** is uniquely derived from the proprietary precision of highly specified enzymes, applied at strategic timepoints to deconstruct large protein strands into digestion-resistant, physiologically stimulating, 3-unit peptides*.

The molecular weight of **MoriKol®** marine tripeptide brand averages 1500 Da. It is uniquely concentrated to the **bioavailable tripeptide fraction 'Gly-X-Y', at 280 Da (at a 15% minimum)**; where X and Y are collagen-building amino acids, like hydroxyproline, proline or alanine. This digestion-resistant fraction has been proven to: move passively across the intestinal membrane, be found intact in the plasma and be either directly incorporated into damaged tissue or indirectly stimulate its repair. The bioactivity of **MoriKol®** has been clinically validated in skin care at 1g and in joint, bone and cardiovascular health, at higher doses.

MoriKol's optimized formation uniquely avails it to the convenience and universality of a low, 1g-2 cap/day or 4 gummies/day delivery. Alternatively, its neutral taste, odor and water soluble character makes for easy powder flavoring. It's marine sourcing removes any concerns about BSE or FMD and avails it to customers from all belief systems. Rigorous testing for heavy metals and antibiotics supports 'clean' product labeling. (*Note: 15% of MoriKol's peptides are only 3 amino acids in length)

Clinically Proven

DOSAGE

- 1 gram

DESIGN

- 64 healthy women
- 40-60 yo w/photo-aged skin
- 12-wk DBPCR study: Korea

RESULTS

- ↑ • 7X moisture; 6 wks.
- ↓ • 10.5X visible wrinkling
- ↓ • Avg skin roughness; 6 wks.
- ↑ • Net & overall elasticity

(p<0.05)
